

*Randolph Bourne*

**H. L. Mencken**

Mr. Mencken gives the impression of an able mind so harried and irritated by the philistinism of American life that it has not been able to attain its full power. These more carefully worked-over critical essays are, on the whole, less interesting and provocative than the irresponsible comment he gives us in his magazine. How is it that so robust a hater of uplift and puritanism becomes so fanatical a crusader himself? One is forced to call Mr. Mencken a moralist, for with him appraisal has constantly to stop while he tilts against philistine critics and outrageous puritans. In order to show how good a writer is, he must first show how deplorably fatuous, malicious or ignorant are all those who dislike him. Such a proof is undoubtedly the first impulse of any mind that cares deeply about artistic values. But Mr. Mencken too often permits it to be his last, and wastes away into a desert of invective. Yet he has all the raw material of the good critic — moral freedom, a passion for ideas and for literary beauty, vigor and pungency of phrase, considerable reference and knowledge. Why have these intellectual qualities and possessions been worked up only so partially into the finished attitude of criticism? Has he not let himself be the victim of that paralyzing Demos against which he so justly rages? As you follow his strident paragraphs, you become a little sorry that there is not more of a contrast in tone between his illumination of the brave, the free, and the beautiful, and the peevish complaints of the superannuated critics of the old school. When are we going to get anything critically curative done for our generation, if our critical rebels are to spend their lives cutting off hydra-heads of American stodginess?

Mr. Mencken's moralism infects the essay on Conrad perhaps the least. With considerable effort the critic shakes himself loose from the clutches of his puritan enemies and sets Conrad very justly in relation to his time. "What he sees and describes in his books," Mr. Mencken says, "is not merely this man's aspiration or that woman's destiny, but the overwhelming sweep and devastation of universal forces, the great central drama that is at the heart of all other dramas, the tragic struggles of the soul of man under the gross stupidity and obscene joking of the gods." He likes Dreiser for the same reason, because "he puts into his novels a touch of the eternal Weltschmerz. They get below drama that is of the moment and reveal the greater drama that is without end." Mr. Mencken discusses Dreiser with admirable balance, and his essay is important because it criticizes him more harshly and more searchingly than many of us dare to do when we are defending him against the outrageous puritan. The essay on Huneker is perhaps the most entertaining. If "to be a civilized man in America is measurably less difficult, despite the war, than it used to be, say, in 1890" (when Mr. Mencken, by the way, was ten years old), it is to Mr. Huneker's gallant excitement that part of the credit is due.

Dreiser and Huneker Mr. Mencken used with the utmost lustiness, as Samson used the jaw-bone, to slay a thousand Philistines, and his zeal mounts to a closing essay on Puritanism as a Literary Force, which employs all the Menckonian artillery. Here Mr. Mencken, as the moralist contra moralism, runs amuck. It is an exposure that should stir our blood, but it is so heavily documented and so stern in its conviction of the brooding curtain of bigotry that hangs over our land, that its effect must be to throw paralyzing terror into every American mind that henceforth dares to think of not being a prude. Mr. Mencken wants to liberate, but any one who took his huge concern seriously would never dare challenge in any form that engine of puritanism which derives its energy from the history and soul of the American people. Mr. Mencken is much in earnest. His invective rises above the tone of scornful exaggeration. But his despair seems a little forced. I cannot see that the younger writers — particularly the verse-writers — are conscious of living under any such cultural terrorism as he describes. Mr. Mencken admits that the puritan proscription is irrational and incalculable in its operation. Surely as long as there are magazines and publishers — as there are in increasing numbers — who will issue vigorous and candid work, comstockery in art must be seen as an annoying but not dominating force. Mr. Mencken queerly shows himself as editor, of “a long list of such things by American authors, well-devised, well-imagined, respectable as human documents and as works of art — but never to be printed in mine or any other American magazine.” But what is this but to act as busy ally to that very comstockery he denounces? If the Menckens are not going to run the risk, in the name of freedom, they are scarcely justified in trying to infect us with their own caution.

The perspective is false that sees this persecution as peculiar to America. Was not Lemonnier prosecuted in Paris? Did not Baudelaire, Flaubert, Zola suffer? Did not Zola’s publisher in England die in prison? Has not D. H. Lawrence’s latest novel been suppressed in England before it had even a chance to be prosecuted here? It is England not America that has an official censorship of plays. Comstockery is not so much a function of American culture as it is of the current moralism of our general middle-class civilization. The attack must be, as Nietzsche made it, on that moralism rather than on its symptoms. But Mr. Mencken is not particularly happy in his understanding of Nietzsche. He wrote the book from which a majority of the Americans who know about Nietzsche seem to have gotten their ideas. How crude a summary it is may be seen by comparing it with the recent study of Nietzsche by another American, W. M. Salter. One wishes Mr. Mencken had spent more time in understanding the depth and subtleties of Nietzsche, and less on shuddering at puritanism as a literary force, and on discovering how the public libraries and newspaper reviewers are treating Theodore Dreiser.

Mr. Mencken's mode of critical attack thus plays into the hands of the philistines, demoralizes the artist, and demoralizes his own critical power. Why cannot Demos be left alone for a while to its commercial magazines and its mawkish novels? All good writing is produced in serene unconsciousness of what Demos desires or demands. It cannot be created at all if the artist worries about what Demos will think of him or do to him. The artist writes for that imagined audience of perfect comprehenders. The critic must judge for that audience too.
